

50 Liter Vertical Autoclave - Brazil

For Sterilization of Surgical Instruments, Chemical Laboratory Equipments

- Vertical boiler manufactured in stainless steel
- Externally coated with heat-insulating material
- Bronze Cover to reduces energy used and does not transfer heat to the environment
- Control Valve to adjust working pressure
- Drain for cleaning and total drainage through ball valve
- Pressure gauge with two scales,
one for the temperature (from 100 to 143 C°)
and another for the pressure (from 0 to 3.0 Kgf/cm)
- Maximum working Pressure of 2.3 Kgf/cm² or 2,4 bar,
corresponding to 134° C
- Relief valve of pressure regulated to act under pressure
equal to or higher than the MPWP
(maximum permissible working pressure)
