

Mini Orbital Shaker

SH-10A

Features

- Microcomputer control temperature, frequency and time,
- the built-in power-off protection, can automatically failback after the power supply be in normal power supply
- Big screen LCD screen, can simultaneous display temperature, frequency and time, menu interface,
- easy to understand, locking type operation mode, prevent mistake.
- Dc motor start up, big torque, wide speed range, constant torque and maintenance-free.
- User can adjust starting torque of motor avoid the instrument can not operating for the too big load, when the oscillation is too violent, it will automatically stop working, starting up and slowing down is stable
- Multiple specified shake frames and fixtures are optional which are simple and convenient to change, greatly improve working efficiency.
- Multistage programming function, which can simplify the complex test process, truly realize automatically control and operation.
- Standard Configuration Of Tray
- Multi-functional spring clip is made of stainless steel, flasks, tubes, coated wells
- can be put on it

Specification

Name

Orbital Shaker

Model

SH-10A

Oscillation frequency

50~300r/min

Amplitude

10mm

Dimensions mm

280 x 270 x 110
