3 In 1

- Chemistry Analyser
- Real Coagulometer
- Dry Incubator

- Semi-automated photometric system.
- Effective temperature regulation system.
- Dual LED System with hibernate power consuming function up to 20,000h.
- Full quality control management system with Levy-Jennings plot.
- Real time curve monitoring.
- Voice guide.
- Incubator with temperature and time control.
- Future proof operating system can be easily upgraded.
- 5" TFT LCD with Touchscreen, 800x480 pixels.
- Flexible cuvette concept, interchangeable flow through, standard cuvette, macro cuvette.
- Independent coagulation system (PT, PTT, FIB) run with coagulometer plastic cuvettes.
- Two different tests at the same time.
- Carry over elimination.
- Self startup check with power interruption protection.

Dual LED System

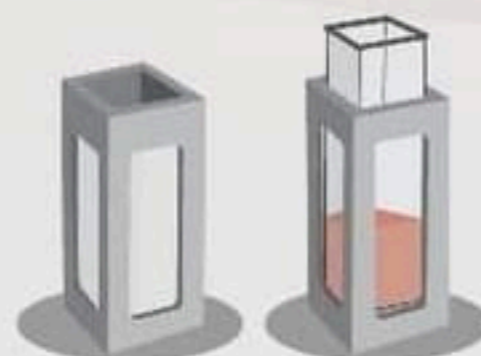

with life time 20,000h
Standard leds with focus lens

Dual LED

Not Halogen

Macro Cuvette Holder

Micro flow cell: 32 μ l, 10 mm light path
interchangeable with normal standard cuvettes
(Standard disposable plastic cuvettes, macro
disposable plastic cuvettes).

Transparent color coagulometer plastic
cuvettes.
